

KIDDE

PRO LINE™

WATER AND WET CHEMICAL

FEATURES

- Safe and durable, fully stainless steel cylinder.
- Top quality chrome plated, brass valve.
- Extinguisher resists corrosion, dents, and punctures.
- Easy to service. Water model uses plain tap water and standard air check.
- Maximum performance at both high and low temperature extremes.

WATER & WET CHEMICAL

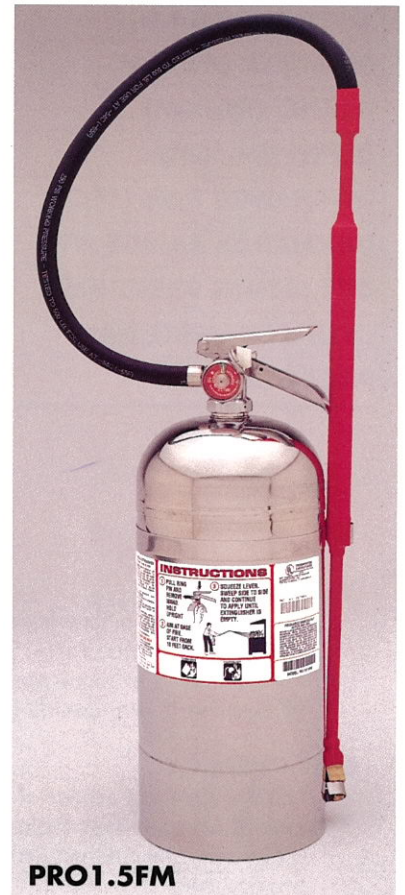

Water is an effective agent against Class A fires. It is conductive and cannot be used against Class B or C fires.

Wet Chemical model was designed to work in conjunction with pre-engineered restaurant hood systems. It utilizes a potassium acetate solution for Class B and C fires cooking appliance applications.
